Good morning,

Getting close to install is great news. There still seems to be misunderstanding about camera locations. Michael and I had a meeting a few weeks ago and discussed camera 1's location (which we got moved). We also discussed camera 3 as it is mislabeled as East Main Street and Kennedy Dr. Michael and I discussed this and he was going to try and update the label somewhere in the system. We also discussed its location. I see from the tracking link that camera 3 is west of shale drive and not east of shale drive. This would allow someone to come into town from the east, turn onto shale drive and miss all of the cameras coming into town. This was the same situation we just worked through with camera 1's location and river road. We are a small community and when word gets out (we plan to advertise) that we have LPR's coming into town, I see this loophole being utilized by locals.

I must have camera 3 on the east of shale drive for the same reason I had to have camera 1 west of River Road. I apologize for the miscommunication. I am willing to meet to discuss further and understand any changes delays the process.

Thanks.
